PORT OF AUTHORITY UPDATE

Following the loss of the 800 system on WTC the Port of Authority has been forced to use most of their old UHF channels. Up until October 18 the EDACS system was running extremely low power and virtually inaudible here in central Bergen County. This evening I see they are back on the air but activity appears to be limited to Newark Airport operations. Chatter on the various scanner news groups suggests that they will eventually change over to a Motorola trunked system. In the interim, fans of the Port of Authority can scan the following channels.

Ch	Freq	PL	Use
1	453.400	110.9	Central Police Desk
2	453.650	100.0	Kenedy Airport Secondary
3	453.650	123.0	Laguardia Airport
4	453.650	136.5	Newark Airport
5	453.800	100.0	G.W. Bridge
6	453.800	123.0	Holland Tunnel
7	453.800	136.5	Staten Island Bridges
8	453.375	100.0	Kennedy Airport Primary
9	453.375	110.9	**
	453.375	123.0	Lincoln Tunnel & Tow Trucks
	477.2875		***Bergen County Command Center @ GWB - "Unit 856"

** - Formerly used at WTC

US-TALIBAN PROPAGANDA EFFORTS

<http://www.clandestineradio.com/>

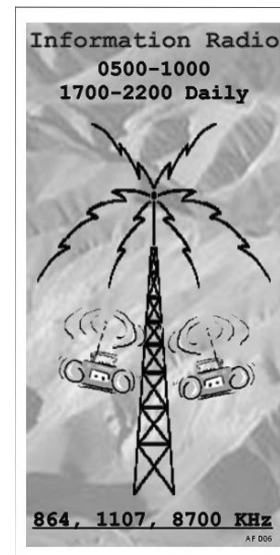

CNN's web site recently carried a story that the Pentagon is sending radio broadcasts into Afghanistan telling the Taliban they are "condemned."

According to an English language translation posted on the Pentagon's Web site, one message gives the Taliban forces instructions how to surrender to U.S. troops.

"When you decide to surrender, approach United

States forces with your hands in the air. Sling your weapon across your back muzzle towards the ground. Remove your magazine and expel any rounds. Doing this is your only chance of survival."

The Pentagon said the propoganda broadcasts began last weekend and originate from a flying radio station, a specially outfitted EC-130, known as "Commando Solo."

Curious, I e-mailed Larry Van Horn at Monitoring Times to see if he knew any more about this. Larry responded and told me that several people have heard the station on 8.700 USB. This evening, 10-18-2001, at 0100UTC I was able to copy a station that I believe to be that mentioned above. Arabic music and frequent mentions of "Taliban". Anyone out there know the Afghan language?

Our loyal contributor, "R", in Ct passed along some info that may allow listeners to request a letter of verification from the D.O.D. He mentions that they prefer recordings over a letter. A cover letter including your location, date, time and frequency should be included. Tape and letter should be sent to "Comando Solo", Lt. Edward E Shank, 193rd Special Ops, 81 Constellation Court, Middletown, PA 17057

NYPD 10 CODE UPDATE

With all the anthrax related activities NYPD has added a new 10 code, "**10-44**" for "Suspicious Substance."

NY METRO MALLS

Thanksgiving and November mark the official beginning of the holiday season. It's become a yearly tradition to publish a list of all the local malls. When your spouse or significant other asks you to go shopping drag your scanner and an earphone along and keep up with the action. This year security will probably be much tighter so the scanning will be very good! Remember, be discrete!

NYC MARATHON

Believe it or not it's time once again for the New York Marathon. This year it will be held on November 4. This year also presents Marathon administrators with many added security issues related to the attack on WTC. Sources told The Urban DX'er that an added military presence, though not obvious to the public, will be in position. These include added support by air, land and sea. We suspect that many of the frequencies used in the days following September 11th may again be active, especially those used for air support.

Repeating tradition the amateur radio community will provide the majority of the necessary communications. Since listings of specific repeaters are not released (to avoid intentional jamming) we suggest scanning the 440-450 MHz portion of the amateur band if you're interested in listening.

Another as yet undecided scenario is how the media helicopters will cover this years marathon. At this time the news / traffic helicopters are not allowed to fly in NYC airspace. One suggestion was to allow them to fly above the adjacent rivers and use their telephoto lens to cover the race from afar. The Urban DX'er did receive additional information as to how possible scenarios might be handled and which agencies were in place to respond. Since these are hypothetical scenarios we believe it is in the best public interest that we avoid public discussions in forums like this newsletter. During the race, "action" frequencies will be shared via our E mail distribution list. In addition to frequencies we've been listening to we suggest adding the Coast Guard's "LANT" channels.

WB6NYC WEB SITE

On the days following September 11 the news media made numerous mentions of a radio amateur in CA who recorded the transmissions of NYPD and FDNY moments after the first alarms came in. That amateur radio operator was Bob Sanford, WB6NYC. Bob, a former New Yorker and NYDXA net participant. Bob recently added additional recordings to his web site located at <http://bayscan1.50megs.com/>

Thanks
Bob, WA2SQQ
