January, 2006  
[NYDXA@yahoo.com](mailto:NYDXA@yahoo.com)

### IFLOWS

<http://docs.afws.net/supportsite/iflows/>

Perhaps while hiking or walking by a stream that cuts through your town, you've discovered a small yagi antenna pointed towards the sky. We've come to classify these as simply water flow sensors that transmit data to an unknown location. In reality these are part of the National Weather Service's IFLOW system. Rod, N2RVM forwarded me a link to their web site – a most informative sight that includes an overview of the system complete with frequencies!

The frequencies these devices use is generally in the 171, 406 & 412 MHz ranges. The site above provides several PDF files that graphically lay out the system, county by county. For example Bergen, Essex, Morris, Passaic counties all link to the site on Garrett Mountain in West Paterson on 406.125. Responses from the Garrett Mountain site are sent to each of the above sites on 412.625 MHz. The entire network map can be accessed at <http://docs.afws.net/supportsite/iflows/netcfg.pdf>

New Jersey listeners may wish to use <http://docs.afws.net/supportsite/iflows/nj.htm> which provides a county map (with active links).

And finally, check out the AFWS home page where you can view virtually real time data the system collects.

<http://docs.afws.net/>

### LOOKING FOR SPORTS FREQUENCIES?

<http://www.bearcat1.com/sports.htm>

This is a mammoth list of frequencies for virtually every sport, venue and recreational facility.

### NEW NYPD CHANNEL

This evening (12/28) NYPD Queens Radio Repair was busy testing the new repeater on 472.6125 with PL of 151.4. Radio Repair was calling over "testing on Traffic Enforcement".

Just recently found the following changes for Hackensack Fire:

### Established 1984

All Under KYU 903

159.2850/151.4225 MHz New Repeater need PL  
453.5625 MHz New Repeater need PL

It looks like Hackensack will be coming off 154.385 MHz(R) to the new frequency above but this was not coordinated thru the Fire coordinator but the Forestry Coordinator

### NJ TRANSIT

We occasionally receive requests for the frequencies used by NJ Transit rail operations. Here's the entire list arranged by transmitter location.

Hoboken  
160.440 MoW  
160.830 PD Ch1 PL 123.0

***"INTEROPS"***

All of a sudden "Interops" seems to be the newest buzz word in scanning and communications. We were first introduced to this problem in those weeks following the flooding in New Orleans. The idea that one agency or town is unable to communicate with neighboring towns is unthinkable in a day where synthesized radios are common. Even the current issue of Monitoring Times features this topic on it's front page.

In New Jersey, sources in Morris County told me that The NJ State Attorney General's office has "fat pockets" to eventually fund a unified communications system that will cover Morris County, southward to as far as Monmouth County. Morris County is now in the process of installing "MURS" radio in each municipality. These radios that operate on the Morris County trunked system provide seamless communications between the County and each municipality.

In New Jersey the following frequencies licensed to New Jersey State Attorney General have been allocated for "interop" communications:

<u>Freq</u>	<u>PL</u>	<u>Use</u>
151.1375	156.7	VTAC 1

154.4525 156.7 VTAC 2  
 155.7525 CSQ VCALL  
 158.7375 156.7 VTAC 3  
 159.4725 156.7 VTAC 4

453.2125 156.7 UCALL  
 453.4625 156.7 UTAC 1  
 453.7125 156.7 UTAC 2  
 453.8625 156.7 UTAC 3  
 458.2125  
 458.4625  
 458.7125  
 458.8625

470.0875 173.8 UTAC 5  
 470.2375 186.2 UTAC 4  
 472.8750 192.8 UTAC 6  
 473.0875  
 473.2375  
 475.8750

500.1625, 500.2375, 500.2625, 503.1125  
 503.2375, 503.2625

506.0875, 506.1125, 506.1625, 506.2125  
 506.2625, 509.0875, 509.1125, 509.1625  
 509.2125, 509.2625

866.0125 156.7 ICALL  
 866.5125 156.7 ITAC 1  
 867.0125 156.7 ITAC 2  
 867.5125 156.7 ITAC 3  
 868.0125 156.7 ITAC 4  
 866.8750 156.7 ICOM NY/NJ

In Connecticut the STOCS system provides "interop" communications. It consists of three (3) VHF frequencies, three (3) UHF frequencies and five (5) 800MHz frequencies combined into five (5) Interoperability channel groups as follows:

CTGP1	154.4525	458.4625	855.9875
	All Counties		
CTGP-2	158.7375	458.7125	
	855.7125		
ALL except Fairfield			
CTGP-3	159.4725	458.8625	
	858.4625		
ALL except Fairfield & New London			
CTGP-4	158.7375	458.7125	
	860.2375		

FAIRFIELD COUNTY  
 CTGP-5 159.4725 458.8625  
 856.2625

FAIRFIELD NEW LONDON

Sources say that a maximum of 3w is allowed.

[http://www.washingtontechnology.com/news/1\\_1/daily\\_news/27824-1.html](http://www.washingtontechnology.com/news/1_1/daily_news/27824-1.html)

At the federal level things don't seem to be going as smooth. The Homeland Security Department is making slow progress in its efforts to achieve interoperability in first responder communications, Andrew Maner, the department's chief financial officer, said at an academic conference today.

Lack of compatible radio and data communications among first responders became a major issue after 9/11 because of the inability of some firefighters, police and emergency medical personnel at the World Trade Center disaster scene to communicate by radio. It's a longstanding problem affecting most public safety agencies nationwide.

"Interoperability is a very interesting topic—a source of pride and frustration," Maner said at a homeland security budget conference at George Washington University, sponsored by Equity International Inc. business development firm.

"It's one of our primary goals," Maner said. "But I don't know the breaking point for this—how much money it is going to take to achieve it. It feels endless. I feel like we should make more progress."

Maner commented on the current fiscal 2006 budget, but he declined to provide details of the upcoming fiscal 2007 budget request for DHS before it is announced by the president, which is expected to occur in February.

But Maner did say he was pleased with the fiscal 2007 budget request and that it will address six major priorities of the department established by Secretary Michael Chertoff's second-stage review: preparedness, transportation security, border security, information sharing, DHS financial management and IT management, and realignments.

Asked about the Integrated Wireless Network—a \$10 billion enterprise network being created for DHS, Treasury and Justice Departments—Maner suggested some consolidation may be needed among various wireless initiatives, including those sponsored by the Border Patrol and the Coast

Guard.

“We have an enormous amount of money being spent on wireless, and it dawned on us that it’s not all pointed in the right direction,” Maner said. Without necessarily changing budgets, the various wireless programs can “be done more cohesively,” he said. “It screams out for some consolidation of efforts.”

**MIL AIR MONITORING**

Bob, N1MLZ shares a fantastic list of Military Air frequencies he’s received from his location in CT. Given the altitude of these aircraft, readers should not have any problem receiving these frequencies when active. The 9 page list is attached at the end of this issue. I sorted the list by user & by frequency. If you’re interested in one agency or trying to ID one frequency, this list should prove invaluable.

Thanks Bob!

Urban DX'er would like to thank all those who contributed to this month's issue!

Charlie - N2NOV, Bob – N1MLZ and “Anonymous”
